

# Digital Forensics for Criminal Defense

Expert Preservation, Analysis & Testimony

**Technology now records nearly every aspect of our lives, from our movements and messages to our behaviors and activities. This data can be pivotal in criminal defense.**

---

## **Digital Forensics for Criminal Defense**

At Envista, our certified digital forensics experts preserve and analyze data from computers, mobile phones, cloud platforms, vehicles, and GPS-enabled devices. We use industry-standard forensic tools and apply advanced validation techniques to ensure that our findings are both accurate and clearly communicated.

### **WHEN CAN DIGITAL FORENSICS HELP?**

Our services are routinely used in a wide range of criminal investigations, including:

- Appellate Cases
- Arson
- Child Exploitation / CSAM Child Sexual Abuse Material
- Conspiracy / Organized Crime
- Cybercrime / Unauthorized Access
- Domestic Violence / Stalking
- Drug Trafficking / Possession
- DUI Manslaughter / Hit and Run
- Homicide / Attempted Murder
- Sexual Assault
- Theft / Burglary / Robbery
- Weapons Charges
- White Collar Crimes

Digital evidence can confirm or challenge timelines, establish or undermine intent, and provide critical support in developing a strong defense strategy.

## How Envista Can Help

### Cell Phone Forensics

Cell phones store massive amounts of data, including calls, texts, emails, photos, app usage, and location history. Our experts recover both active and deleted data using leading forensic software. This evidence can verify alibis, challenge accusations, or clarify events in dispute.

---

### Location Forensics

By examining call detail records (CDRs), GPS, Google location records, and other location evidence, we determine the likely location of a phone at key times. These methods help affirm or dispute the prosecution's location-based claims.

---

### Computer Forensics

We examine hundreds of computers, servers, and external devices each year. Whether it's recovering deleted files, reconstructing timelines, or identifying system use, we provide full support from early analysis through testimony. Our methods meet industry standards and ensure findings are defensible.

---

### Vehicle System Forensics

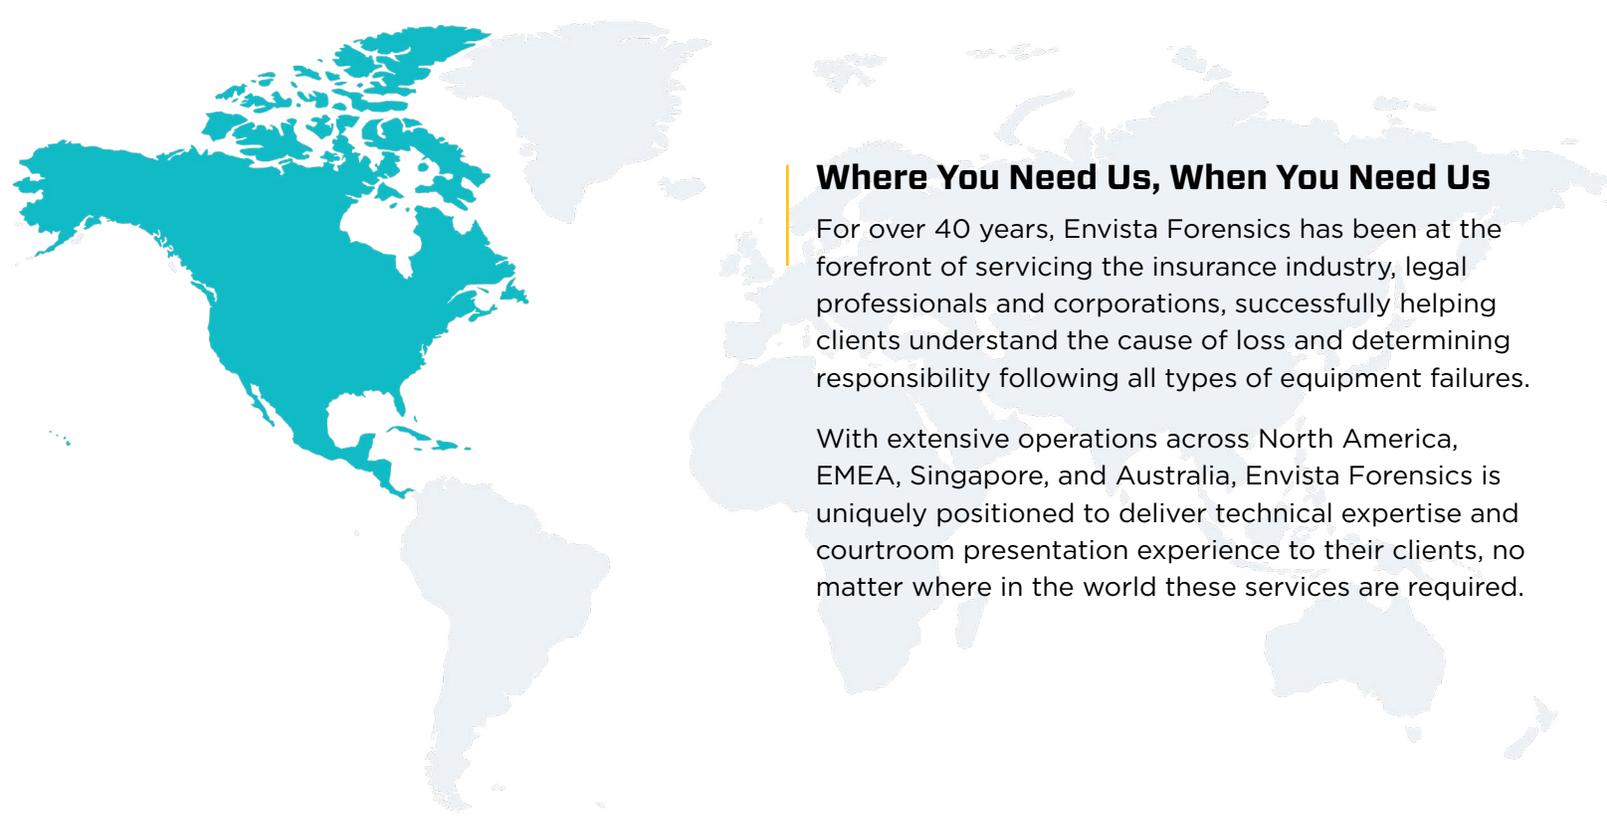

Modern vehicles store surprising amounts of digital data. Infotainment and telematics systems may log navigation history, call records, gear shifts, light usage, door status, and more. We extract and interpret this information to clarify vehicle use, driver behavior, and potential distractions.
