## Equipment Consulting & Hardware/Software Failure Analysis

In today's environment, computer hardware and software play an integral role in company operations. Damage or failures to these systems can be catastrophic in terms of business interruption, which is why identifying the cause of loss is pertinent for restoring business operations, resolving insurance claims, and expediting litigation.

When a loss or failure occurs, Envista's IT equipment experts provide a full range of services to assess damaged equipment, recover lost data, determine cause of the loss, assess business impact, and provide expert witness testimony when needed.

### Our Equipment Consultants can assist with:

- » Evaluation & testing equipment
- » Remote assistance, lab testing, & onsite inspections
- » Hardware and software cause of loss
- » Surveillance system data recovery
- » IT cost reviews (determining repair/replacement costs)
- » Warranty, replacement & salvage

### Types of Damages & Failures

- » Data Corruption
- » Equipment Breakdown & Contamination
- » Hard Drive Failures
- » Lighting Damage
- » Power Outage
- » Power Surge
- » Shipping and Handling Damage
- » Software Corruption

### Types of IT Equipment

- |                            |  |
|----------------------------|--|
| » Cables                   | » Monitors                                   |
| » Computers                | » Networking Equipment                       |
| » Data Center Equipment    | » Printers                                   |
| » Data Storage Systems     | » Servers                                    |
| » Hard Disk Drives         | » Solid-State Drives                         |
| » Internet of Things (IoT) | » Uninterruptible Power Supply (UPS) Systems |
| » Laptops                  |  |
| » Mainframes               |  |
